範例說明

金先生(40歲)投保本商品，繳交基本保費10萬/20萬/30萬美元且自始未辦理減少年金保單價值準備金及保險單借款，並選擇自第7保單年度起為年金給付開始日，其各年度年金保單價值準備金及可選擇的給付方式如下：

單位：美元

Example

Mr. Jin (aged 40) purchases this product (OUSA) with premium of US\$100,000/ US\$200,000/ US\$300,000. If the applicant has not made partial surrenders and policy loans, and determined the 7th policy anniversary as the annuity payment starting date, the policy value and alternative payment methods are as follows:

Unit: USD

保單年度 End of Policy Year	保險年齡 Attained Age	10萬 US\$100,000			20萬 US\$200,000			30萬 US\$300,000

• 本範例假設生效日為西元2025/1/1且每年宣告利率為2.85%，情況假設以2.70%/2.85%/3.00%三種宣告利率試算，並假設每年宣告利率維持不變；基本保費10萬/20萬/30萬美元之基本保費率為3.6%/3.5%/3.5%；上表數值僅供參考，倘宣告利率調整時金額亦將調整，未來應以各保單年度實際金額為準。

• 本範例年金保單價值準備金之計算：第1保單年度：每日依【基本保費－基本保費費用－每月保險成本】加計按宣告利率以單利法計算之金額。

第2保單年度起：每日依【保單年度初之年金保單價值準備金－每月保險成本】加計按宣告利率以單利法計算之金額。

• 每月保險成本：為提供被保險人本契約身故保險金之保障所需的成本。由本公司每月根據訂立本契約時被保險人的性別、體況、扣款當時之保險年齡及身故保險金計算，並於本契約生效日及其後每保單週月日自年金保單價值準備金中扣除之。若年金保單價值準備金大於基本保費則每月保險成本為零。

• 「宣告利率」：係指本公司於本契約生效日或各保單週年日當月宣告並用以計算該年度年金保單價值準備金之利率。該利率係根據本公司運用此類商品所累積資產的實際狀況，並參考市場利率所訂定，且不得為負數，本公司於每月第一個營業日宣告，同一保單年度內均適用該保單年度首月之宣告利率。(公布於南山人壽企業網站，請至客戶服務/常用功能/利率查詢)

※宣告利率並非固定利率，會隨南山人壽定期宣告而改變，宣告利率之下限亦可能因市場利率偏低，而導致無最低保證。

※宣告利率會隨經濟環境而有波動，南山人壽不負最低宣告利率保證之責。

• This example assumes that the effective date of this contract is 2025/1/1 and that the Declared Interest Rate per year remains at 2.85%. The above table assumes a trial calculation with three Declared Interest Rates of 2.70% / 2.85% / 3.00%, and assumes that the Declared Interest Rates remain unchanged every year; The premium rate for the premium of US\$100,000/ US\$200,000/ US\$300,000 is 3.6%/3.5%/3.5%. The above table is for reference only. The policy value should be calculated with the actual Declared Interest Rate in every policy year.

• The calculation of policy value is based on:

The first policy year: daily based on [premium - premium expenses - monthly Cost-of-Insurance] plus simple interest at the Declared Interest Rate.

From the second policy year: daily based on [Policy value at the beginning of the policy year - monthly Cost-of-Insurance] plus simple interest at the Declared Interest Rate.

• Monthly Cost-of-Insurance: It is the cost of death benefit that provided to the insured, determined by the gender, physical condition of the insured at the time of making the contract, attained age and death benefit amount. It will be deducted from the policy value on the effective date of this contract and the corresponding monthiversary. If the policy value is greater than the premium, the monthly Cost-of-Insurance will be zero.

• Declared Interest Rate: The interest rate that declared on the effective date of this contract or on the corresponding month of each policy anniversary is used for calculating the policy value for that year. The Declared Interest Rate is determined by the portfolio return and the market interest rates and it shall be not a negative value. Nan Shan Life will declare the interest rate on the first business day of each month. The Declared Interest Rate of the first month of the policy year applies within the same policy year. (Please find the "Declared Interest Rate" on Nan Shan Life Insurance's official website. The URL is as follows: www.nanshanlife.com.tw/nanshanlife/service-rate-1)

※The Declared Interest Rate is not a fixed interest rate and will change with Nan Shan Life's periodic announcements. The lower limit of the Declared Interest Rate may be no minimum guarantee due to low market interest rates.

※The Declared Interest Rate will fluctuate with the economic environment, and Nan Shan Life is not responsible for the minimum guarantee of Declared Interest Rate.
